Network solution for print and copy management or vending

Gespage offers a simple solution of access control, cost management or vending of prints and copies on printers or multifunction machines. This solution may be completed by a range of **Cartadis** units for identification or payment purposes, and software modules improving the standard features.

Gespage matches the **needs of public services**, **firms**, **schools**, **universities** and **libraries** wishing to optimize or simplify their financial management or the use of a printer and multifunction fleet.

The **Gespage** solution is proposed either for Linux or Windows operating systems.

Gespage
Print accounting

Corporates and government : your management solution of printing costs

✓ **Gespage deals with a stringent management of print and copy costs** by providing to the person in charge a reliable and quick information, accurately adjustable up to the unit cost of each printing per machine and up to the real time checking of budgets, per project, department, person. Gespage is an unparalleled software tool for efficient sizing of the print resources and for mastering the printing costs. The interface ODBC enables export of data to Excel.

✓ **A solution of printing control** by following the user's request, adjustable by project, department, person, securising the access to documents before their print out by a code, a personal card or a login. Gespage is not limited to connected devices like printers or MFP, it may also manage not connected copiers via the COPICODE IP (access code), with or without TCM2 for Mifare contactless cards, TCBK01 for bar code cards, TCMAG1 for ISO magnetic cards.

✓ **A user friendly web interface** leads to an easy handling and a quick management of the printing queue, the costs and tariffs for every copier or configuration.

A global solution of printing management, Gespage features a simple technical functioning, an accurate control of costs or tariffs and printing jobs are optimized by controlling their costs and by increasing the service to users.

Libraries : your payment solution of copies and printings

✓ **Gespage is also a complete payment solution** of printings and copies by means of debit card readers **Cartadis** (TCRS, TC4N or TC20). The use of the dispenser-reloader Cartadis DRC4 dispensing magnetic cards (compatible TCRS/TC4N), provides a suitable answer to libraries needs.

The Dispenser-reloader DRC4 (coins and/or banknotes) for a non stop service to users, without requiring staff.

The card readers TCRS and TC4N for the payments on printers or copiers not connected.

✓ A solution featuring an anonymous and securised access to users together with a simple and quick management of the printing queue.

Schools and universities : the simple management of student and teacher access

✓ **Gespage deals with a stringent and simple management of accounts** in the matter of access authorizations to machines and the credit management of students, teachers or public services, **even if they are a great number**. The access to the controlled devices is locked when a user is not authorized (non identified, unsufficient credit or card lost).

✓ **A practical solution and suitable to the needs of students, teachers and managers**, mixable access types like debit card for the ones or the debit of an account (limited or not) for the others. The visibility in real time of budget consumption per service, project, user.

✓ The magnetic cards readers such as TC4N / TCRS / DRC4 will carry out with the payment of copies and printings.

✓ By using the terminal Cartadis TC20, **Gespage** is compatible with the **CARTADIS chip cards**. The payment of prints and copies is directly debited from the card.

The CR3 for reloading the CARTADIS private chip cards with coins and/or banknotes, without requiring staff.

The card readers TCRS and TC4N for the payment by means of magnetic cards CARTADIS.

Gespage : a tailored solution thanks to optional modules

✓ **Gespage** is a **reliable** solution featuring the utmost CARTADIS technology **whatever the brand of your machines** (languages PCL5, PCL6 and Postscript, protocoles TCP/IP or Jet Direct).

✓ **A user friendly web interface** leads to an easy handling and a quick management of the printing queue, the costs and tariffs for every copier or configuration. The optimized costs are carried out by directing the teachers to the machines fitted with the requested service.

✓ **Three extra modules customize the Gespage solution to your needs:**

Web Payment	**Cloud Printing**	**Operator Module**
A module of Gespage account reloading by banking card, from a dedicated internet site.	To print, from the web on Gespage, without print driver.	To limit the access rights to the administration function of Gespage.

Cartadis : a full range of comptatible equipments

✓ **CARTADIS provides a range of units and services coming from a 30 year experience in the field** of the access control and the payment of copy units. Cartadis offers products and solutions **compatible with all brands (CANON, HP, KONICA MINOLTA, KYOCERA MITA, OCE, RICOH, SHARP, TOSHIBA, XEROX …)**, and gives advice about payment process, securised printings and management of the authorizations.

✓ A compatible solution with the work stations fitted with **Windows 2003 / 2008 / Seven / XP / Vista / LINUX / MAC** using (or not) Active Directory logins.

✓ **A Cartadis unit for each of needs :**
- Anonymous users (releasing of the printings from a payment station) :
  TC4N, TCRS, TC20.
- Identified users (releasing of the printings from a Cartadis unit) :
  Copicode-IP (alone or with a card reader TCM2, TCBK01 or TCMAG1), TC20, TCMIRS, CMI with TCM2 reader, TCBK01 or TCMAG1.

The magnetic card reader **Cartadis TC4N**, connected to a station of PC type, for the anonymous payment of copies and printings.

The **TC 20**, reader of the CARTADIS private chip cards assumes the payment and the control (Gespage accounts) of printings and copies.

The magnetic card reader **Cartadis TCRS**, connected to a **CMI**, assumes the payment and the control (Gespage accounts) of printings and copies.

Thre **COPICODE-IP** improves the system of management and payment of printings to copiers not networked, via an alphanumerical identification code. By integrating the TCM2-MIFARE, it enables users' identification via a contactless MIFARE card or a 125 Khz.

The Dispenser-reloader **DRC4** (coins and/or banknotes) equipment of automatic dispensing and reloading Cartadis magnetic cards, for a non stop service without requiring staff.
